

# How Kenya is Being Destroyed

Kenya is being deliberately destroyed by powerful entities, who are using a multi-dimensional, weaken and conquer approach to grab our country.

The ruling elite has allowed their cartel friends to invade the agricultural sector.

These cartels have positioned themselves as middle-men in regard to various crops, and are mercilessly stealing from farmers.

Consequently the money paid to farmers for selling their crops has reduced drastically, in the past 9 months.

- Coffee farmers are currently being paid 58% LESS per kilo, compared to 1 year ago.

- Macadamia farmers are currently being paid 90% LESS per kilo, compared to 1 year ago (this is not an error - it is 90% REDUCED price for macadamia farmers)

And it is the same sad story for other farmers, whether it is tea, rice...

Local manufacturers are also crying, because pro-regime cartels have been allowed to import TAX FREE, goods that are made locally.

Many local industries have had to drastically reduce production, leading to laying off of workers.

For instance, in the edible oil importation scam, Kenya has lost Sh10 billion, with one of the beneficiaries/importers being the CS trade.

## Cash crop farmers pained by low prices

Saturday, June 17, 2023

*A farmer tends to a coffee bush in Nyeri town on May 10, 2023. Coffee, macadamia, rice, tea and avocado have recorded a drastic drop in prices in recent months as powerful cartels invade the agriculture sector, threatening the livelihoods of thousands of farmers nationwide.* Joseph Kanyi | Nati

Coffee, macadamia, rice, tea and avocado have recorded a drastic drop in prices in recent months as powerful cartels invade the agriculture sector, threatening the livelihoods of thousands of farmers nationwide.

Coffee, which was retailing at least Sh100 per kilogramme last year, is now fetching only Sh42. A kilo of macadamia is now selling at Sh20, down from a high of Sh200 in 2019.

It is the same sad story for tea, rice, sugarcane and avocado farmers as prices dip with farmers piling pressure on the Kenya Kwanza government to fulfil the minimum guaranteed returns to cushion them from heavy losses.

Some farmers are now contemplating uprooting their coffee bushes and macadamia trees, arguing they enjoyed higher rates and bonuses before the new administration took over. Mr Joseph Mwangi said unless the government intervenes, they will uproot the bushes to plant maize.

“I am very bitter. How can the prices drop from Sh100 to Sh40 per kilo? We need answers and not lip service by the government as we are tired of these gimmicks. People are joking around with our livelihoods.

“We have become slaves of this coffee. It is discouraging even the young generation from venturing into coffee farming. We want the government to come up with a permanent solution,” Mr Mwangi said in Murang’a.

# How Ruto's first Cabinet meeting birthed questionable edible oil deal

Monday, June 19, 2023

President William Ruto's first-ever Cabinet meeting passed a resolution that gave blessings to an importation deal that has seen private firms import oil tax-free, then sell the commodity to a government agency at a higher price, an NTV investigation has revealed.

Documents in our possession show how companies associated with insiders of Dr Ruto were single-sourced to procure oil for the Kenya National Trading Corporation (KNTC) in a series of tricks where Kenyans stand to lose at least Sh6 billion.

Taxpayers, analysis shows, could lose another Sh10 billion in unlawful tax exemptions related to oil imports. The simple anatomy of the scheme is: A need is created to import oil tax-free. Then somehow, private firms get to import the oil, rather than have a government agency do that.

Among the companies awarded the local purchase order were Shehena Trading Commodity Limited, Purma Holdings Limited, Multi Commerce FZC, and Charma Holdings Limited.

In the first consignment that arrived in Mombasa in early April 2023, the importers' landed cost for a 20-litre jerrycan of cooking oil was \$20 (Sh2,740). KNTC bought from the importers CIF Mombasa at a price of \$26 (Sh3,618), excluding VAT.

In simple terms, the importers will pocket \$6 per jerrycan of oil brought into the country. At the end of it all, they will earn a massive \$41,500,000 (Sh5,651,250,000) from the import of the 125,000 metric tonnes.

The figures show that the whole import plan would generate nearly \$76 million (Sh10 billion) waiver in taxes that the government granted to KNTC.

Shehena Trading Commodity Limited is 100 per cent owned by Invest Africa (FZCO), a company registered in a Dubai-free zone. It will supply Sh1.33 billion worth of oil. The company is said to be closely associated with a top cabinet secretary.

**Cabinet Secretary is Moses Kuria, CS Trade - he made several billions in this deal**

Purma Holdings Limited is owned by the chairperson of the board of the Communications Authority of Kenya, Mary Wambui.

Multi Commerce FZC, a company registered in a Dubai free zone, won an LPO for a Sh8.12 billion supply. The company is reportedly owned by a prominent politically-connected businessman, said to be associated with a major new mall in Nairobi's Eastleigh.

Charma Holdings Limited will supply Sh2 billion worth of oil.

For now, taxpayers will lose over Sh9 billion through the KNTC, its intention to provide cheaper commodities including cooking oil

# Demographics

GoK has been pushing the so-called Digital ID, very hard.

They have even been going to Pakistan to look for people who can make them these IDs (Yes, Pakistan).

This is because that is the instrument they plan to use, to completely change Kenya demographics.

Certain prominent people in this regime have been claiming that, in the next census, Mandera will have a higher population than Murang'a.

Anyone who has been to both counties recently, must be wondering where that huge population in Mandera live, because you can travel for 100km there, without seeing anyone.

(This is not about the good people of Mandera. They have nothing to do with the racket being played)

What is happening is this (and they have been planning to do this for years):

There are more than 3 million foreigners who live in Kenya.

Most are refugees from neighbouring countries, both documented and undocumented.

Others are businessmen (legal & illegal businesses), and all sorts of people doing various trades in the country.

(Aside: About 15 years ago, I went to see a certain East Asian medical professional in Nairobi (had seen ad in newspaper, and decided to try Eastern medicine). I was very surprised to see many people, all East Asian - at least 2 dozen - coming out of some inner rooms...their strange behaviour made me think that there was human trafficking going on...)

The plot is to make these millions of foreigners Kenya citizens, complete with Digital IDs "proving" their citizenship.

Most real Kenyans will technically become 2nd class citizens.

What do they gain by making these foreigners citizens?

If you are a foreigner living in a certain country, and you would want to become citizen, but is unable to, the person who grants you that citizenship under the table becomes your hero.

For the Kenyan Big Man and his foreign backers, these are millions of votes in the bag, in any future election.

The Big Man will never need to steal an election in future.

He will win cleanly, buoyed by votes from these millions of foreigners granted Kenyan citizenship illegally, using Digital IDs.

And if he wants to become Life President, he will simply order parliament - which he will be controlling, by at least 80% majority - to pass that legislation...

A couple of years ago, there were thousands of strange foreigners loitering in Nairobi streets.

It was said that they were Afghans en-route to wherever.

It so happens that, in the Middle East and Central Asia, there are many politically unstable countries, some that have millions of their people living as refugees in other countries.

If you have been living in some Middle Eastern/Central Asia refugee camp for years, and you are offered regular income and citizenship, even in a country like Kenya, you will gladly take it.

Since it is not Kenya government that will be paying these people - they would be paid by the regime's foreign allies - the regime sees new votes coming in...

Soon, real Kenyans will be seeing thousands of these strangers in the streets of Nairobi, Mombasa, Malindi...only to be shocked when they realise these strangers are also "Kenyan citizens", complete with Digital IDs.

Therefore, when you hear them saying county X's population will double in 5 years, it is these foreigners who would be doubling that population.

Obviously, the Digital ID must specify your home county.

And these millions of foreigners, who will be granted Kenya citizenship illegally, must also be "given a home county".

## Foreign Powers

Top Western Media are falling over themselves praising Kenya's Big Man.

This week, there have been several articles by foreign media that presented the Big Man as the best president in Africa.

- Forbes: "Kenya: Creator of opportunity" (13 June 2023)

- Bloomberg & Washington Post: "Kenya Is Poised to Become the Singapore of Africa" (14 June 2023)

Do you think they would write these grovelling articles about the country, if Kibaki was president?

No way.

Opinion  
[Tyler Cowen](#)

## Kenya Is Poised to Become the 'Singapore of Africa'

The continent's growth is an opportunity for multinational corporations, and its seventh-most-populous nation is well-positioned to take advantage.

# KENYA: Creator Of Opportunity

Published 4 days ago  
By Penresa

Kenyans who have read these articles must be wondering what country they are writing about, because life has never been worse.

These type of articles are reserved for a president who is "their man".

These media represent the opinion of Western Powers.

Western Powers are therefore saying, Kenya's Big Man is "our man".

Oppose him, and you become our enemy.

When Mobutu was president of DRC (he had renamed it Zaire), he was their darling.

Like Kenya's Big Man, Mobutu hated constructing roads, and claimed it was a waste of money.

He refused to build roads in his country, so that Congolese could not easily travel from one region to the next, and gossip about how he had his meals delivered direct from top European hotels, to his Gbadolite palace in Northern Congo.

Mobutu had a major airport constructed in Gbadolite.

Supersonic Concorde would land and leave there regularly, bringing him various supplies - including food and drinks - direct from Europe.

# Ruto, Gachagua, Mudavadi offices to get additional Sh3.4 billion in new mini-budget

Thursday, June 15, 2023

The offices of President William Ruto, Deputy President Rigathi Gachagua and Prime Cabinet Secretary Musalia Mudavadi are set to receive an additional Sh3.4 billion in fresh budget revisions. In its second 2022/23 supplementary budget that covers spending in the fiscal year to June 30, 2023, the National Treasury has proposed additional spending to the three offices amidst what has been a choke in development spending with the capital allocations set to fall by Sh39 billion.

The Executive Office of the President will see the lion's share of budget increases at Sh3.1 billion while allocations to the Office of the Deputy President and the Prime Cabinet Secretary will rise by Sh166 million and Sh81.3 million respectively.

State House Nairobi has been allocated an additional Sh1.5 billion where the bulk of the monies have been appropriated to hospitality supplies and services at Sh231 million.

The Office of the First Lady will meanwhile receive an additional Sh295.7 million, the bulk of which covers salaries with the balance spread between personal allowances, domestic travel and hospitality.

# Finance Bill 2023 & The Economy

The Chief Government Economic Adviser has said that:

- Corruption is thriving in govt, and will continue thriving;
- Wastage of taxpayers' money by senior govt officials is at a very high level, and will continue (and wananchi cannot do anything about it).

In 2nd supplementary budget that covers spending to June 30, 2023, the National Treasury additional spending...

1. Office of Deputy of the Big Man: Sh166 million;

2. Prime Cabinet Secretary: Sh81.3 million.

3. Executive Office of the Big Man: Sh3.1 billion.

4. State House: Sh1.5 billion.

Total for Big Man = Sh4.6 billion.

Total for top 3 = Sh166 million + Sh81.3 million + Sh4.6 billion = Sh4.85 BILLION.

Sh4.85 BILLION to be spent by 3 top offices, before 30th June 2023.

Major Eating.

## Ruto budget: Kenya's total debt to hit Sh10 trillion mark

Saturday, June 17, 2023

*Kenya's total debt ceiling of Sh9.1 trillion which represents about 60 per cent of the Gross Domestic Product is expected to hit Sh10 trillion.*

## 26 alcohol factories shut in Uhuru-era tax disputes reopened

Wednesday, November 02, 2022

They then force the cruel, anti-people Finance Bill 2023 through parliament, claiming they need to tax Kenyan workers more, because the government has no money.

They also forcefully pass the housing tax...

They are deliberately provoking Kenyans.

They are saying, "We can do whatever we want with your money...we can even steal it, and you will do nothing about it".

The housing tax is outright theft of workers' money.

They believe Kenyans cannot do anything about this abuse by the government, but is that true?

In 2010, Tunisia president Zine El Abidine Ben Ali also thought he was too powerful.

1. Ben Ali had total control of parliament, just like Kenya's Big Man.
2. Most MPs feared Ben Ali, and would pass any bill he sent to parliament, just like most Kenya MPs fear the Big Man, and would pass any bill he sends to parliament.
3. Corruption was thriving under Ben Ali's rule, and he was doing nothing to end it, just like is happening in Kenya.

4. Due to corruption and bad govt policies, Tunisians were suffering under unprecedented inflation, as is happening in Kenya today.

5. Most Tunisians had become hopeless and desperate. Just like the case in Kenya now.

Eventually, Tunisian people, exercising their sovereign power, forcefully removed president Ben Ali from office.

Sovereign power rests with the people.
